

eQuotes Joomla! Demonstrations

There was a false report that the eQuotes version for Joomla 1.0 is vulnerable to SQL injection. eQuotes does not have the reported vulnerability. For more information, see this forum post:

<http://forum.joomla.org/viewtopic.php?f=471&t=298844&p=1319936>

This page demonstrates the various features of the eQuotes Joomla! extension. There are several eQuote modules active on this page. Each module uses a different source. All modules are set to display quotations randomly. Simply refresh this page to see the next set of random quotes. You can also view all quotations in the database through the optional eQuotes component.

The Joomla Extensions site contains independent user reviews. eQuotes can be downloaded from the Joomla! Forge. For more information and help files, see eQuotes Documentation.
